Data Analytics / Executive Reporting Project

Reporting period: 2024–2025

Generated on: 2026-06-13

Executive Summary

Canada-Brazil merchandise trade reached \$14.47B in 2025, 16.0% versus 2024. Exports totaled \$2.89B while imports reached \$11.58B, leaving a trade balance of \$-8.69B. The largest provincial contribution came from Ontario. The strongest product chapter by absolute change was Precious Stones, Metals and Jewelry. The baseline outlook for 2026 implies total trade near \$16.78B if current momentum persists.

Key Trade Indicators

Canada–Brazil trade expansion was driven by higher import volumes, maintaining a persistent trade imbalance. The current trajectory implies continued expansion under baseline conditions.

Total Trade \$14.47B	Growth +15.98%	Exports \$2.89B	Imports \$11.58B	Balance \$-8.69B	2026 Outlook \$16.78B

Trade Expansion Summary

Total Canada–Brazil trade expanded significantly in 2025, driven primarily by strong import growth. While exports also increased, imports remain structurally higher, reinforcing Canada's position as a net importer in the bilateral relationship. The expansion reflects increased demand and stronger trade flows rather than a shift in trade balance.

Trade Expansion with Brazil — 2025 Summary

While volume hit **CAD\$14.5 BI**, Canada remains a **Net Importer** with a CAD\$8.7 BI spending gap.

Chart 2.1 Canada–Brazil trade expansion summary, 2024–2025

Annual Trade Overview

Canada–Brazil trade increased in 2025, with both exports and imports rising compared to 2024. As a result, the overall trade relationship expanded while Canada maintained a net importer position.

Canada's Exports and Imports with Brazil reached record levels in 2025

Total trade value grew to **CAD\$14.5 BI**, driven by a **+28.5%** increase in exports and **+13.2%** in imports.

Chart 2.2 Canada exports and imports with Brazil, 2024–2025

Bilateral Trade Volume Shift

The bilateral trade corridor shifted to a higher absolute volume, indicating stronger commercial engagement between Canada and Brazil. However, the expansion occurred without a structural correction in the trade balance.

Bilateral trade volume has shifted to a new level, exceeding CAD\$14 BI

*Trade flows expanded by **CAD\$2.0 BI**, reflecting a year of intensified bilateral activity.*

Chart 2.3 Bilateral trade volume shift, 2024–2025

Monthly Performance Comparative

Monthly performance shows periods of acceleration and moderation throughout the year. Despite fluctuations, the overall trend remains upward, with imports consistently exceeding exports.

Monthly Performance Comparative — Year-over-Year Change

Monthly trade compares 2025 against 2024. Top 2 growth and top 2 decline months highlighted with category-level breakdown.

Notable months — YoY change

Apr +44.2%

Top 3 drivers of YoY change:

- Precious Stones, Metals and Jewelry (+244M)
- Inorganic Chemicals (+135M)
- Fertilizers (+98M)

Dec +42.0%

Top 3 drivers of YoY change:

- Precious Stones, Metals and Jewelry (+279M)
- Aircraft and Spacecraft (+129M)
- Fertilizers (+44M)

Aug -22.5%

Top 3 drivers of YoY change:

- Inorganic Chemicals (-122M)
- Aircraft and Spacecraft (-116M)
- Iron and Steel (-46M)

May -4.1%

Top 3 drivers of YoY change:

- Aircraft and Spacecraft (-84M)
- Sugars and Sugar Confectionery (-78M)
- Inorganic Chemicals (-74M)

Chart 2.4 Monthly trade performance comparative, 2024–2025

Monthly Trade Flow

Monthly trade flows highlight a persistent and structural import surplus, with imports exceeding exports in every observed period.

Monthly Trade Flow: Imports continue to outpace exports

The average monthly deficit was **CAD\$0.69 BI**, and the latest observed gap reached **CAD\$0.99 BI**.

Chart 2.5 Monthly exports and imports trade flow

Comparative Trade Mix

The trade composition improved slightly, with exports gaining marginal share relative to imports. However, imports still dominate the overall mix.

Closing the gap: Canada improved its trade mix in 2025

*The import-to-export ratio improved from **4.6** to **4.0**, a **11.9%** improvement in trade balance efficiency.*

For every CAD\$1 exported,
CAD\$4.6 were imported

For every CAD\$1 exported,
CAD\$4.0 were imported

Chart 2.6 Comparative trade mix by exports and imports

Product Performance Ranking

Product level performance reveals a divergence between high growth and declining categories. Trade expansion remains dependent on specific product groups.

Product momentum is diverging — top winner: Cocoa and Cocoa Preparations

Fastest growing category: **+212.2%** | weakest performer: Live Animals at **-83.2%**.

*Excludes HS Chapters 98 and 99, zero-value categories, and very small bases. Values inside bars shown in thousands (K).

Chart 2.7 Product performance ranking by YoY growth

Provincial Trade Volume

Trade activity is highly concentrated geographically, with a limited number of provinces accounting for the largest share of total volume.

Ontario Dominates 2025 Trade Volume at CAD\$7.22 BI

*The province accounts for **49.9%** of total provincial trade, confirming a highly concentrated trade footprint.*

2025 Trade Volume (CAD\$ Billion)

Chart 2.8 Provincial trade volume ranking

Province Growth & Decline — Polished View

Provincial performance shows a clear divergence, with some regions expanding rapidly while others contract.

Alberta Leads Provincial Growth at +49.2% (CAD\$0.24 BI) in 2025

8 provinces expanded trade flows while 4 contracted, signalling diverging regional investment priorities.

Chart 2.9 Provincial growth and decline by trade value

Strategic Provincial Investment Map

The strategic map identifies provinces that combine scale and growth as the most attractive investment opportunities.

Ontario Leads the Most Attractive Provincial Trade Position in 2025

Centered quadrants separate scale and momentum, while bubble size shows the magnitude of absolute trade change.

Bubble size represents absolute trade change. Dark green highlights the lead strategic province, while the upper-right quadrant marks the strongest combined position.

Chart 2.10 Strategic provincial investment map

Ontario Spotlight

Ontario remains the dominant province in Canada–Brazil trade, contributing the largest share of total volume.

Ontario Remains the Dominant Provincial Trade Engine in 2025

Ontario reached CAD\$7.22B in trade volume, representing **49.9%** of total provincial trade and delivering **+23.4%** year-over-year growth.

Ontario Position in 2025

\$	CAD\$7.22B	→	2025 trade volume
↗	+23.4%	→	Year-over-year growth
Δ	CAD\$+1,371M	→	Absolute trade change
#	#1	→	Volume rank out of 12
#	#7	→	Growth rank out of 12

Ontario Share of Provincial Trade

Ontario accounts for 49.9% of total provincial trade in 2025.

Key Takeaways

- 01 Ontario generated CAD\$7.22B in trade in 2025, representing 49.9% of national provincial trade.
- 02 Ontario's trade grew +23.4% year-over-year, outperforming most other provinces and driving national growth.
- 03 Ontario is the #1 province by trade volume and ranks #7 by growth among 12 provinces.
- 04 Trade concentration in Ontario highlights the importance of diversifying provincial exposure to reduce national concentration risk.

Chart 2.11a Ontario trade position and key metrics, 2025

Ontario Spotlight — Top Product Chapters

Ontario's trade profile is concentrated in a small group of high-value product chapters.

Top 5 Ontario Chapters

Ranked by 2025 trade value

The top chapter represents CAD\$4.32B in 2025 trade value, showing that Ontario's trade profile is concentrated in a small group of categories.

Chart 2.11b Ontario top 5 product chapters by trade value, 2025

Forecast Validation and Baseline Outlook

Forecast validation suggests that recent trade trends are stable enough to support a continued expansion scenario.

2026 Baseline Projection Points to CAD\$16.2B Total Trade Volume

Best backtested method: **Seasonally Adjusted YoY Baseline** | Validation: **15.3% MAPE** and **14.7% sMAPE**
Projection supports a **+12.0%** projected increase versus 2025.

Chart 2.12a 2026 baseline projection — monthly trade volume forecast

Forecast Validation and Baseline Outlook — Tables

The tables below validate the baseline forecast method and show the monthly projection range.

Metric	Definition
MAE	Mean Absolute Error — average absolute difference between predicted and actual values; lower is better.
MAPE	Mean Absolute Percentage Error — average absolute percentage error relative to actuals; lower is better.
sMAPE	Symmetric Mean Absolute Percentage Error — percentage accuracy measure symmetric around zero; lower is better.
